

I INTRODUCTION

1.1	Background	1-1
1.2	Building Enclosure as a System	1-1
1.3	The Guide	1-2

2 BEHAVIOUR OF WOOD IN CONSTRUCTION

2.1	Characteristics of Wood.....	2-1
2.2	Moisture Content and Shrinkage of Wood	2-1
2.3	Decay in Wood	2-6
2.4	Wood Framing Issues.....	2-7

3 HEAT, AIR AND MOISTURE CONTROL PRINCIPLES

3.1	Exterior Environment.....	3-1
3.2	Interior Environment.....	3-3
3.3	Moisture Balance.....	3-8
3.4	Mechanisms of Heat Flow	3-9
3.5	Heat Flow Control.....	3-11
3.6	Water Penetration Control.....	3-13
3.7	Air Flow Control.....	3-20
3.8	Condensation Control.....	3-23
3.9	Control of Construction Moisture.....	3-27

4 ENERGY

4.1	Heat Transfer and Building Enclosure Assemblies.....	4-1
4.2	Air Leakage	4-10
4.3	Building Code Compliance.....	4-11
4.4	Part 9 BCBC Buildings	4-16
4.5	Part 9 VBBL Buildings.....	4-17
4.6	ASHRAE 90.1 2004 & 2007 Compliance.....	4-17
4.7	Part 3 BCBC Buildings	4-18
4.8	Part 3 VBBL Buildings – City of Vancouver	4-20
4.9	Effective Assembly Insulating Value Calculations – Sample Assemblies	4-21
4.10	Energy Star Program.....	4-26
4.11	Whole Building Enclosure Energy Performance	4-27

5 ASSEMBLIES

5.1	Critical Barriers	5-1
5.2	Assembly Fact Sheets	5-2
5.3	Assemblies External to Main Environmental Separator	5-4
5.4	Crawl Spaces	5-4
5.5	Below-Grade Wall Assemblies	5-4
5.6	Above-Grade Wall Assemblies.....	5-8

Table of Contents

5.7	Roof Assemblies.....	5-16
5.8	Balcony / Walkway Assemblies	5-26
5.9	Window Assemblies	5-29

6 DETAILS

6.1	General.....	6-1
6.2	Continuity of Critical Barriers.....	6-1
6.3	Detailing of the Water Shedding Surface.....	6-4
6.4	Too Much Membrane	6-5
6.5	The Details	6-6
	Detail 1 – Foundation Wall at Slab.....	6-9
	Detail 2 – Base of Wall/Foundation	6-12
	Detail 3 – Base of Wall/Concrete Parking Deck	6-18
	Detail 4 – Rim Joist	6-21
	Detail 5 – Wall/Cantilevered Floor.....	6-26
	Detail 6 – Exterior Corner	6-30
	Detail 7 – Interior Corner	6-32
	Detail 8 – Cladding Transition Flashing.....	6-34
	Detail 9 – Fire Wall at Exterior Wall	6-36
	Detail 10 – Window Head	6-38
	Detail 11 – Window Jamb	6-43
	Detail 12 – Window Sill.....	6-48
	Detail 13 – Window Sill – High Differential Movement	6-53
	Detail 14 – Door Sill – Protected Membrane.....	6-56
	Detail 15 – Door Sill – Exposed Membrane Pedestrian Surface.....	6-58
	Detail 16 – Accessible Door Sill – Protected Membrane Pedestrian Surface.....	6-60
	Detail 17 – Door Sill – Protected Membrane Roof Deck.....	6-64
	Detail 18 – Water Shedding Roof/Wall	6-66
	Detail 19 – Waterproof Membrane Roof/Wall.....	6-72
	Detail 20 – Fire Wall at Exterior Wall.....	6-77
	Detail 21 – Wall Interface – Exposed Membrane.....	6-79
	Detail 22 – Balcony Edge – Exposed Membrane.....	6-81
	Detail 23 – Railing Attachment At Wall.....	6-83
	Detail 24 – Divider Wall.....	6-85
	Detail 25 – Column Detail	6-87
	Detail 26 – Wall Exhaust Vent	6-89
	Detail 27 – Electrical Fixtures.....	6-91
	Detail 28 – Pipes	6-93
	Detail 29 – Window Head Detail – 3D Illustration	6-95
	Detail 30 – Window Sill Detail – 3D Illustration.....	6-96
	Detail 31 – Balcony/Wall Detail – 3D Illustration	6-97

7 COMPONENTS AND MATERIALS

7.1	Scope	7-1
7.2	Wood Products	7-1
7.3	Insulation.....	7-4

7.4	Sheathing Membranes.....	7-5
7.5	Flashings.....	7-8
7.6	Eavestroughs and Rain Water Leaders	7-13
7.7	Cladding.....	7-14
7.8	Windows	7-19
7.9	Insulating Glass Units.....	7-19
7.10	Skylights	7-20
7.11	Doors.....	7-25
7.12	Sealants	7-26
7.13	Painting and Exterior Coatings	7-29
7.14	Water Shedding Roofing	7-31
7.15	Waterproof Roofing.....	7-32
7.16	Balcony and Walkway Pedestrian Traffic Membranes.....	7-36

8 MAINTENANCE AND RENEWALS

8.1	Overview.....	8-1
8.2	Why Maintain?.....	8-2
8.3	Maintenance Planning	8-3
8.4	Renewals Planning.....	8-4
8.5	Design Considerations.....	8-5
